2. CITATIONS AND EXPLANATIONS

Claims 1-27 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest an automated electronic banking system for initiating and automatically processing transactions having a step of automatically retaining in a customer's system an intermediary document (IDOC) in a remote function call queue (RFC), for a predetermined period of time, to permit the IDOC to be passed into an eBanking interface for automatically processing transaction.

Claims 1-27 meet industrial applicability as defined by PCT Article 33(4) because the present invention is useful in finance and remote banking industry.
